Overview

Chamfer Detail:

Grommets:

Worksurface grommets are available factory installed on certain models.

- See pricing pages for availability.
- See page 6 for grommet locations.

Worksurfaces are 1³/₁₆"-thick, 3-ply, balanced construction with a solid wood rim.

Chamfered end panels encapsulate the worksurface, giving Prevail its distinct design.

Hinged access doors for cable routing are located on the approach side of all desks.

Drawer fronts are 3/4"-thick, 3-ply construction with vertically matched grain. 5-sided drawer construction allows easy removal of drawer fronts.

Pedestals are full height and letter width.

Plinth base with adjustable levelers is standard on all Prevail casegoods. Base is banded with ABS for durability in a platinum finish.

Details

Exterior surfaces are available in cherry veneer. Veneers are carefully selected and matched to assure proper balance and consistency.

Worksurfaces are wood.

Joints are securely fastened with screws, glue, and solid hardwood cleats to ensure maximum strength.

Drawer sides and back are 1/2" thick and wrapped in black vinyl. Bottoms are 1/8" thick.

Drawer suspensions feature black slides with precision steel ball bearings to ensure long-lasting, quiet, smooth operation. Box drawers are 3/4 extension. File drawers are full extension.

Black filing rods are standard in all file drawers and accommodate various filing requirements.

- See page 7 for filing capabilities.

Hinged modesty panels are standard on bridges, returns, kneespace credenzas, and single-pedestal credenzas. A latch holds modesty panel in place.

Pulls:

Integral pulls (33) are located on the kneespace side of pedestals

Integral pulls on freestanding lateral files are notched areas (finger pulls) on both sides of each drawer front.

Locks:

Face-mounted locks are standard on all desks, credenzas, returns, and lateral files. Lock cylinders are shipped installed on Kwik Office models and are keyed randomly. Key numbers will be assigned arbitrarily at the factory with key numbers ranging from KCCB001 to KCCB025.

Half-Round Cord Openings:

Desks, credenzas, and returns feature a half-round cord opening in the side of each pedestal just below the worksurface in the kneespace or storage area.

Credenzas feature three additional half-round cord openings along the back.

Worksurface Grommets:

Worksurface grommets (G1) are standard on single pedestal desks, bridges, returns, and credenzas. They are plastic with a matte black finish.

Half-round cord openings for routing cords and cables are standard on all desks, returns, and credenzas.

Hinged modesty panel is standard on bridges, returns, kneespace credenzas, and single pedestal credenzas. It swings inward to allow access to wall outlets.

Opening below hinged access door allows cord to enter or exit the cable routing compartment on the approach side.

Security panel separates the drawers from the cable routing compartment to prevent unwanted access to the drawer contents.

Note: Some of the items in this illustration, including undersurface wire manager, power communication convenience outlet, panel grommets, and executive return with printer pedestal, are available at standard lead times.

➤ See the Casegoods and Tables Price List.

Hinged access doors allow access to cable routing compartment. Both single- and double-pedestal desks feature two access doors, one on the left and one on the right on the approach side.

Grommet Locations:

Single pedestal desks are standard with worksurface grommets on both left and right.

Bridges and returns are standard with one worksurface grommet, centered in the kneespace.

Kneespace credenzas and file/file single pedestal credenzas are standard with one worksurface grommet, centered in the kneespace.

Storage credenzas and lateral file single pedestal credenzas are standard with worksurface grommets on both left and right along the back edge.
