# Hero. Just for You.

## Side Chair Models:

**Side chairs** feature a  $\frac{7}{8}$ " tubular steel frame. Mesh-back construction is the same as desk chair; upholstered back is similar but features 1" CFC- and CHC-free molded foam. Seat cushions are  $1\frac{9}{16}$ " CFC- and CHC-free molded foam. Stackable up to 4 high.

## Options:

**Adjustable lumbar support for mesh-back desk chairs** utilizes a molded polyurethane pad, allowing 2" height and 1" depth adjustments.

**Adjustable lumbar support for upholstered-back desk chairs** utilizes air-pressure technology. Height is adjustable within a  $2\frac{1}{2}$ " range.

**4-D arm option** enables the user to make front-to-back adjustment within a 2" range (7 positions) and 360° pivot (10 positions). Includes the same adjustment features as 2-D arms, as well.

## Overview

### Mesh-back models

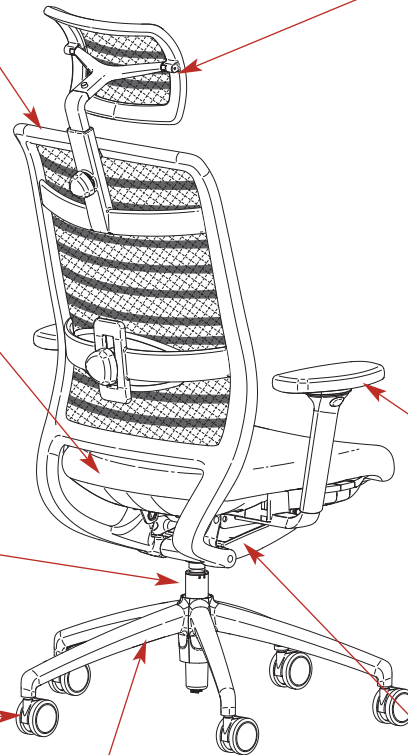

incorporate a ribbed design perfectly proportioned to give ergonomically correct, flexible support in all upright or reclined positions. Available in three colors. The mesh is secured to a structural, black plastic frame made of glass-filled polypropylene.

**Seat cushions** are  $2\frac{1}{8}$ " thick— $1\frac{3}{4}$ " CFC- and CHC-free molded foam, plus  $\frac{3}{8}$ " Dacron top pad.

**Fabric or leather upholstery** is unglued, ensuring optimal air movement.

**Seat height** adjusts from  $16\frac{1}{4}$ " to  $22\frac{7}{16}$ " via a patented twist/threaded column adjustment feature and pneumatic (gas) cylinder.

**Black, dual-wheel casters on desk chairs** are 65mm in diameter and available in hard and soft options. Specify hard casters (802) for chairs that will be used on carpeted floors. Specify soft casters (801) for chairs that will be used on hard floors.

**Headrest** on high-back models is height and depth adjustable—3" range for height and 2" range for depth—and also pivots.

**Upholstered-back models** features a three-piece assembly—a visible, black plastic/polypropylene back with  $\frac{3}{4}$ " CFC- and CHC-free molded foam covered in specified upholstery. The fabric back assembly is then secured to a structural frame made of glass-filled polypropylene.

**T-shaped arm rests** are standard with 2D adjustability. User can adjust the arm vertically within a 4" range (11 positions); technician can adjust the arm horizontally within a  $1\frac{3}{4}$ " range (unlimited positions). Arm caps are black polyurethane.

**Autofit synchro mechanism** with automatic weight regulation and fine adjustment is standard. 126° maximum opening angle between seat and back; can be locked in four positions.

**Five-star base** is available in glass-filled nylon black plastic or cast aluminum in three finish options.

## Adjustability Features:

Synchro-tilt	•
Pneumatic height	•
Swivel	•
Tilt tension	•
Lumbar	◦
Seat depth	◦
Back tilt lock	•
2-D arms	•
4-D arms	◦

• = standard ◦ = option

**Active seat depth adjustment option** provides user with more resting surface for their thighs; 2" adjustment range.

**Anti-kick back feature** controls forward movement of the back rest when the lock is disengaged.

## Weight Rating:

**Desk and side chairs** are user rated up to 275 lbs.
