

## Statement of Line

*A series of possibilities for traditional offices, combining Queen Anne, Georgian and Chippendale influences in lighter-scale furniture for today's management seating needs. Softened edges correspond with the curvature of arms. Backrests are set to provide full support, with armrests sized to allow for pulling close to desks and tables.*

## Suffolk Overview

### Design Variations:

Mid-Back  
Desk Chair

Mid-Back  
Side Chair

Open Back  
Side Chair

**Three models** are available: mid-back desk, mid-back side, and a complementary open-back side chair.

**Cushions** are high-resiliency, CFC-free polyurethane foam.

**Brass trim nails**, standard on all models, are individually driven head to head around the bottom edge of the upholstered arm caps.

**Antique English hooded ball casters** are standard on desk chair with casters.

**Arm caps** are upholstered.

**Frame** is kiln-dried hackberry.

**5-prong base** has a rigid steel understructure and hardwood caps with radius ends.

### Features

**Joints** are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks and four screws.

**Side-to-side rails on desk chair** provide strength and a secure place to mount the swivel tilt mechanism.

**Seat suspension** is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

**3" thick seat cushion** is applied to the flexible webbing suspension.

**1½" thick back cushion** is bonded to the hardwood back panel.

**Upholstery** is wrapped over the cushions and secured with upholstery staples.

**Plastic chair guards** protect the outer edges of the upholstery on both sides of the back on the desk chair.

**Swivel tilt mechanism** on desk chair is attached with T-nuts and machine screws.

**Nickel-plated glides** on side chairs are 7/8" in diameter.

### Adjustability Features

#### Desk Chair

|               |   |
|---------------|---|
| Swivel tilt   | • |
| Manual height | • |

• = standard

**Swivel tilt control** allows reclining while keeping the back-to-seat angle constant. It features a heavy-duty adjustable torsion spring.

**Manual height adjustment** allows user to adjust the seat height of an unoccupied chair by turning the bell. Turning the bell clockwise raises the chair; turning the bell counter-clockwise lowers the chair.

### Actual Dimensions:

|                  | Desk     | Side |
|------------------|----------|------|

## Springfield Overview

### Design Variations:

Desk chair Side chair  
(plain upholstery)

Desk chair Side chair  
(button-tufted upholstery)

**Button tufting** features hand-pleated diamond tufts on seat and inside back. Metal-prong button unit is pulled through the cover and foam, then inserted through a paperboard washer and a self-locking steel spring retainer and clinched.

**Models with brass trim nails**, with either plain or button-tufted upholstery, are available.

**Frame** is kiln-dried maple hardwoods.

**Brass trim nails**, if selected, are individually driven head to head around the bottom edge of seat and around back.

**5-prong base** has a rigid steel understructure and curved hardwood caps.

**Arms** are maple hardwoods.

**Cushions** are high resiliency, CFC-free polyurethane foam.

**Antique English hooded ball casters** are standard on desk chairs.

### Features

**Joints** are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with corner blocks secured with four screws.

**Side-to-side rails on desk chair** provide strength and a secure place to mount the swivel tilt mechanism.

**Seat suspension** is constructed of unidirectional webbing that is machine stretched across the open frame and stapled to the side rails.

**Springfield desk chairs** are suitable for pull-up use in conference settings.

**Seat cushion** is dual density foam applied to the flexible webbing suspension.

**Back suspension** is constructed of four weaves of heavy webbing secured to the frame with staples. A lighter weight webbing is then applied over the four-weave strips. Foam is applied to the suspension.

**Upholstery** is wrapped over the cushions and secured with upholstery staples.

**Swivel tilt mechanism** on desk chair is attached with T-nuts and machine screws.

**Nickel-plated glides** on side chairs are 7/8" in diameter.

### Adjustability Features

#### Desk Chair

|                  |   |
|------------------|---|
| Swivel tilt      | • |
| Pneumatic height | • |

• = standard

**Swivel tilt control** allows reclining while keeping the back-to-seat angle constant. It features a heavy-duty adjustable torsion spring.

**Pneumatic height adjustment** allows user to raise or lower the seat height with a control lever while seated. Up or down movement of lever located beneath the seat activates a gas cylinder to quickly adjust the chair.

### Actual Dimensions:

| Desk Chair  | 972       |
|-------------|-----------|

## Hillsborough Overview

### Design Variations:

Side Chair

2-Seat Lounge

3-Seat Lounge

**Frame** is kiln-dried maple hardwoods.

**Brass trim nails** are individually driven head to head around the bottom edge of seat and on the front of rolled arm.

**Cushions** are high resiliency, CFC-free polyurethane foam.

**Legs** are reinforced with stretchers and rails for added durability.

### Features

**Joints** are double doweled and securely glued to ensure maximum strength. Tie screws are added for strength. Seat is reinforced with support rails and corner blocks secured with four screws for extreme rigidity and strength.

**Seat suspension** is constructed with pre-assembled high carbon, high tensile, hand drawn drop-in coil spring units, covered with a high-quality woven webbing. A 1/4" insulator pad is applied over the seat suspension. Denim material is upholstered over the pad.

**Removable seat cushions** have 4 1/4" of bonded foam on side chair, 4" of bonded foam on 2-seat and 3-seat lounge.

**Back suspension** is constructed of five 11" gauge sinuous springs that are suspended from the frame by metal clips. Springs are tied together with a strong steel-resistant wrapping.

**Back cushion** is 3" thick and is supported with a layer of high-quality woven webbing covering the back suspension. Rails are padded with foam for additional cushioning.

**Upholstery** is wrapped over the cushions and secured with upholstery staples.

**Nickel-plated glides** are 7/8" in diameter.

### Actual Dimensions:

|                      |         |
|----------------------|---------|
