Overview and Pricing

Kwik Office Model:

Task Chair with Height-Adjustable Arms (QK20BT)

- Fixed arm caps
- 39¼"–44"H x 27½"W x 26½"D

Option:

Seat slider is available to adjust the seat depth for comfort. Seat depth is adjusted via a single lever and locks in one of six positions within a 2" range. Upcharge applies.

Low seat height

cylinder/base combination is available to allow the seat height to be adjusted from 15" to 18" off the floor, accommodating the lower end of the BIFMA recommended ranges for seat height adjustment.

Soft, black arm caps are self-skimming polyurethane foam that is free-pour molded over a steel insert.

Height-adjustable arms adjust with a push button to one of 5 positions within a 2¾" range.

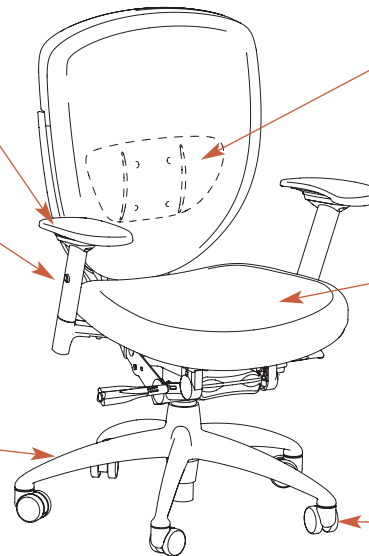

5-prong base is constructed of rigid, engineering nylon resin. Black surface is textured for scuff resistance.

Features

Wishbone back frame is injection molded using glass-filled nylon. Upright is attached using 2 high-strength, internal hex, pan-head machine bolts with heavy washers.

Back shroud and lumbar shroud is injection-molded polypropylene.

Lumbar support pad, made of polypropylene, moves 2½" for optimal comfort and support. Neoprene is used to support foam in the lumbar area and allows for movement.

Custom controlled-density CFC-free urethane foam provides comfort consistency and contour for proper body support. Seats feature dual-density foam.

Hard dual-wheel casters (C1) are standard.

Inner back panel is injection-molded polypropylene, designed with a reinforcing pattern to ensure rigidity.

Inner seat panel is molded, 9/16" 9-ply (1/16" poplar per ply), single-shell construction with a waterfall front edge.

Seat cushions have 2" of base foam, plus a ½" soft topper pad, to enhance comfort and reduce fatigue. Base foam includes ½" filler centered on the bottom of the cushion for added support. Seat cushions feature a waterfall front edge.

Back cushions have 1¾" of foam to enhance comfort and reduce fatigue. Edges of foam used on seat and back are wrapped with ¾" of heavier-density foam for clean contours.

Seamed, slipcover-style upholstery on both the back and seat accommodates a wide variety of fabrics.

Arms have a structural upright encased in an injection-molded, glass-filled nylon shroud. Arms are secured to the chair with ¼" x 20 fasteners.

How to Specify:

- Model:
QK20BT
- Back:**
- Upholstery grade
- Upholstery number
▶ See page 122 for upholstery selections.
- Seat:**
- Upholstery grade
- Upholstery number
- Back frame finish:
462 = Cinder
501 = Platinum metallic (+\$50)
- Seat slider: **X** = None
SL = With seat slider (+\$70)
- Pneumatic cylinder:
STD = Standard
LS = Low seat (+\$25)
- Base finish:
462 = Cinder
- Casters:
C1 = Hard casters
