

# Finishes & Materials

## Table of Contents

### Samples:

#### Samples of Kimball Office wood finishes and paints

are available upon request. Samples are to be used as guidelines only. Slight variations within commercial tolerance may occur in color and texture.

To order samples:

- Visit the Partner web site at [www.kimballoffice.com](http://www.kimballoffice.com) to order materials electronically
- Contact your Kimball Office Sales Representative or the nearest Kimball Office Showroom

### Matching Finishes:

**The wood species on seating may vary** from the wood species on the casegood or system. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

**For Casegoods or Systems products,** please reference the appropriate price list for finish or paint designators and product application.

## Program Overview

### Discontinuation Policy:

**Kimball Office** strives to give all business partners advanced notification of surface materials that are scheduled for discontinuation. Efforts will be made to support discontinued materials as specified in the deletion announcement. Pricing cannot be guaranteed. Extended leadtimes and minimum order requirements may apply.

### Disclaimer:

**Kimball Office** will make every reasonable effort to maintain our commitments. If surface material changes must occur due to unforeseen circumstances, we will work with you on an alternative recommendation. Kimball Office reserves the right to cancel or make changes to standard products and surface materials.

### Kimball Office offers a diverse collection of surface materials.

Please see descriptions below to ensure that you are choosing the materials that best support your requirements.

#### Vision Collection Fabrics

##### Our Vision Collection fabrics

offer a wide variety of materials that include both timeless classics, as well as a selection of trendy colors and patterns to keep the offering fresh and current.

**The classic patterns** are perfect for establishing new standard color palettes, while the trendy patterns are great for adding accents and pops of color to make a statement and to show that you are in tune with the pulse of today's fast-paced world.

**The Vision Collection** was developed with an international flare to make it easy for global companies to standardize in all locations. It contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to give us the best selections and service in the industry.

**You will find that colors were developed** to coordinate very well between the in-line and alliance

offerings, as well as between the seating and panel fabric offerings.

**The Vision Collection** will provide options for the discerning client for many years to come.

#### Vision Collection Woods

**The new wood finishes available in the Vision Collection** offer fresh options that provide natural-looking finishes to meet today's design expectations. From the lightest Brighton Maple to the darkness of Urban Walnut, the new finishes will add sophistication and beauty. These finishes were chosen with great attention to offer a complete range of color options making it simple to specify the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of the new walnut or cherry finishes.

**Kimball Office carefully selects veneers and solid woods** to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

### The Vision Collection offers a number of light finishes

that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

**Darker finishes** can be selected to hide more of the veneer's characteristics. Several beautiful coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

**Two surfaces with grain directions that are at different angles to a light source** will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on worksurfaces installed at a 90° angle to each other.

### Two premium veneers, Sapele and Zebrawood,

have been added to the standard offering to provide options for high impact styles without having to quote custom veneers. Zebrawood is a premium composite veneer. Premium veneers could receive extended lead times based on supplier availability at the time the order is placed.

#### Generations Collection

**The Generations Collection** is comprised of tried and true materials that have been in the Kimball Office offering for many years. This collection is designed to support existing customers and to help transition you to the Vision Collection. >Visit [kimballoffice.com](http://kimballoffice.com) to see the Generations Collection.

**IMPORTANT:** Materials in this collection should not be used to set standard color palettes for new installations.

**Materials in this offering** can be ordered using the standard process, however, extended lead times and minimum order quantities may apply. For best results, pre-planning orders with your Customer Service Representative is recommended.

# Finishes & Materials

## Wood Finishes

### Key:

- = Available
- Ⓚ = Available on Kwik Office models

### Price Groups:

**STD** = Group 1 (list price)

**STD2** = Group 2 (20% upcharge)

### Characteristics:

#### Each piece of natural wood

offers unique texture and grain. Minor variations in finish color and value may occur due to the natural characteristics of wood. Kimball Office carefully selects all materials used in every product ensuring a commercially acceptable color and finish. Factors such as aging and exposure to light alter finishes.

#### Brighton (IM) is a clear finish.

Differences in grain character and color are natural characteristics of wood and will show through in the finished product.

**All woods** are susceptible to darkening from exposure to UV rays (sunlights and other sources), especially cherry and maple. Care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change.

\* Available early 2012.

† Adagiato and Beo are constructed of beech wood. Brighton wood finish on Beech is complimentary to Brighton on maple, but is not a direct match.

Note: Bingo is available in Amber, Ebony, Honey, and White. Bingo model numbers incorporate the finish designators. Approach, Event, Itsa, Skye, Wish, and Xtreme are non-wood series.

# Finishes & Materials

## Pricing:

### A one-time fee of \$300 (net)

will be billed for the development of each new custom finish. This fee covers all Kimball Office product lines on which the finish may be used. Models receiving a special finish will also be assessed an upcharge.

### A 10% upcharge per line item (model)

for special wood finish is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

#### Example:

Collage model 4605 in grade 5 upholstery and special wood finish—

Grade 1 upholstery price	\$ 857.00
	x .10
Upcharge for special finish	\$ 85.70
Grade 5 upholstery price	+986.00
List price	\$1071.70

## Special Wood Finishes

### Previously developed and custom finishes

are available for special requirements. Kimball Office has an extensive library of previously developed special finishes which may be an acceptable match for your application. If not, a custom finish can be developed to meet specific needs.

### Samples of previously developed special finishes

are available from Customer Service upon request.

### Applicability of special finish colors

depends on the wood species to which they are applied. The matrix at right shows the types of woods used for each series.

**IMPORTANT:** Kimball Office reserves the right to decline the opportunity to match a finish color.

### Wood Species by Series:

• = standard wood species

◦ = standard wood species on most models in series. Independence Suffolk is constructed of hackberry

➤ See appropriate Overview for details.

Note: Delano and Bingo are not available in special finishes. Special finishes are not available on Zebra wood.

## Approval Process:

- Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (net) special finish development fee, to Customer Service along with a complete list of the products and wood species to which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- If a previously developed sample is found to be compatible, a sample will be sent for customer approval. Custom finishes will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

## How to Specify:

- Build the complete model specification by following the "How to Specify" on the appropriate pricing page for the product that is to receive the special finish.
- For the "finish price group" step, insert special finish code (in place of STD):  
**ZBECH1** = Special beech finish  
**ZCHY1** = Special cherry finish  
**ZMAP1** = Special maple finish  
**ZWAL1** = Special walnut finish  
**ZSAP1** = Special sapele finish  
*Note: Choose the special finish code based on the wood species used in the seating model.*  
 ➤ See chart at left.
- For the "Finish designator" step, insert the designator provided to you by Customer Service.

# Finishes & Materials

## Paints, Non-Paint Finishes, and Laminates

### Key:

- = Available
- \$ = Option; upcharge applies
- K = Available on Kwik Office models

### Characteristics:

**Metallic paint finishes** may appear to have variations in color due to its reflective qualities.

### Upcharges:

**10% upcharge applies for metallic paint on Event.**

Upcharge is calculated on the Grade 1 upholstery price, then added to the price for the selected fabric grade, to arrive at the list price.

Example:

Event model 95-2D in grade 5 upholstery and metallic paint—

Grade 1 uph. price     \$290.00  
                                       x .10

Upcharge for metallic     \$ 29.00

Grade 5 uph. price     +373.00

List price                     \$402.00

**Flat upcharge applies for Ash White paint on Approach.**

➤ See individual pricing pages.

**Flat upcharge applies for metallic paint on Wish.**

➤ See individual pricing pages.

\* Available early 2012.

Note: Only series that are available in paint, non-paint finishes, and laminates are listed here.

# Finishes & Materials

## What are ACT Icons:

**The Association for Contract Textiles (ACT)** has developed voluntary performance guidelines to make fabric specification easier. The five symbols give architects, designers, and end-users a vast amount of performance information in a succinct visual way. Look for these symbols on ACT member company sampling to assure that the fabrics you specify perform up to contract standards and pass all applicable testing.

**These categories describe a material's performance features** as measured by specified methods under standard laboratory conditions. All tests referenced here are intended to represent the most current version of a test method. *Note: Individual ACT member product information may represent a different version of a test method depending on the date the product was introduced to the market.*

**IMPORTANT:** These tests represent minimum requirements which are subject to change without notice and may not reflect requirements or laws in all locations.

## Kimball Office Seating Upholstery ACT Performance Icons

**All Kimball Office fabrics meet,** and in most cases exceed, the minimum requirements set up by ACT. For the purpose of uniformity in the industry, Kimball Office will be utilizing the ACT icons on swatchcards and related materials.

### Flammability

The measurement of a fabric's performance when it is exposed to specific sources of ignition. *Note: ACT guidelines specify different flammability tests dictated by the intended end use for the fabric.*

#### Upholstery

California Technical Bulletin #117 Section E – Class 1 (Pass)

#### Wrapped Panels and Upholstered Walls

ASTM E 84 (Unadhered Mounting Method) – Class A or Class 1

### Wet & Dry Crocking

Transfer of dye from the surface of a dyed or printed fabric onto another surface by rubbing.

#### Upholstery

AATCC 8                      Dry Crocking, Grade 4 minimum  
Wet Crocking, Grade 3 minimum

#### Wrapped Panels and Upholstered Walls

AATCC 8                      Dry Crocking, Grade 3 minimum  
Wet Crocking, Grade 3 minimum

### Colorfastness to Light

A material's degree of resistance to the fading effect of light.

#### Upholstery

AATCC 16 Option 1 or 3    Grade 4 minimum at 40 hours

#### Wrapped Panels and Upholstered Walls

AATCC 16 Option 1 or 3    Grade 4 minimum at 40 hours

### Physical Properties

Pilling is the formation of fuzzy balls of fiber on the surface of a fabric that remain attached to the fabric. Breaking strength is the measurement of stress exerted to pull a fabric apart under tension. Seam Slippage is the movement of yarns in a fabric that occurs when it is pulled apart at a seam.

#### Upholstery

Brush pill ASTM D3511, Class 3 minimum or  
Martindale Tester ASTM D4970, Class 3 minimum

Breaking strength ASTM D5034 (Grab Test)  
50 lbs. minimum in warp and weft

Seam slippage ASTM D4034  
25 lbs. minimum in warp and weft

#### Wrapped Panels and Upholstered Walls

Breaking strength ASTM D5034 (Grab Test)  
35 lbs. minimum in warp and weft

## Kimball Office Seating Upholstery ACT Performance Icons, continued

### Abrasion Resistance

The surface wear of a fabric caused by rubbing and contact with another fabric.

#### General Contract Upholstery

ASTM D4157 (ACT approved #10 Cotton Duck)  
15,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)  
20,000 cycles Martindale method

#### Heavy Duty Upholstery

ASTM D4157 (ACT approved #10 Cotton Duck)  
30,000 double rubs Wyzenbeek method

ASTM D4966 (12 KPa pressure)  
40,000 cycles Martindale method

End use examples of heavy-duty installations where upholstery fabrics rated at 30,000 double rubs should be appropriate are single shift corporate, hotel rooms/suites, conference rooms and dining area usage.

ACT acknowledges that there are extreme wear situations that may require higher levels of abrasion resistance. End use examples that may require higher than 30,000 double rubs include:

24 hour transportation terminals, 24 hour telemarketing, 24 hour healthcare emergency rooms, 24 hour casino gambling areas, and such public gathering places as theatres, stadiums, lecture halls and fast food restaurants.

It is strongly suggested that double rubs exceeding 100,000 are not meaningful in providing additional value in use. Higher abrasion resistance does not necessarily indicate a significant extension of the service life of the fabric.

The Wyzenbeek and Martindale tests are the two methods commonly used to predict wear-ability. Actual performance is determined by many factors such as fiber content, weaves, finishes, furniture design, maintenance, cleaning, and usage. Durability of an upholstery fabric is a complex interaction (combination) of a number of performance tests that, in addition to abrasion, includes seam slippage, pilling, tensile strength, and usage.

There is no correlation between the Wyzenbeek and Martindale tests so it is not possible to estimate the number of cycles that would be achieved on one test if the results from the other test were known.

## Kimball Office Seating Upholstery Standard Regulation Testing

### Standard Regulation Testing by Upholstery Pattern

<i>Pattern</i>	<i>California TB117 (Section E)</i>	<i>UFAC Classification 1 or A</i>	<i>Port Authority of NY and NJ (Method 5903)</i>

### Fire Codes & Flammability

#### TB117

California Flammability Regulation #117 is a set of minimum allowable standards of flammability to which all upholstered furniture sold in the State of California must comply. It relates primarily to fabric coverings and resilient fillings. All shipments of Kimball Office upholstery comply with Regulation #117 and our invoices and law labels for such goods bear certification that our upholstered products comply.

#### UFAC

All Kimball Office seating is made in accordance with the Upholstered Furniture Action Council (UFAC) criteria to reduce chance of ignition by burning cigarettes.

#### TB133 Factor

TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball Office offers a wide variety of seating products that can be manufactured to meet TB133.

#### Double Upholstery Method

Kimball Office products are first upholstered with a fire barrier, the upholstery is then applied over the barrier. The addition of this barrier may slightly alter the comfort and/or aesthetics of the seating product.

### Key:

- = Complies with standard
- ▲ = Test not conducted by supplier

### Advisory

Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants of composite flammability testing. Kimball Office assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball Office prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

# Finishes & Materials

## Kimball Office Seating Upholstery Vision Collection Fabric Application Matrix

### Characteristics:

**Different coverings and seating constructions** will respond better than others to specific seating applications. Certain fabrics are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the covering or application is deficient, but is considered a normal, inherent characteristic.

**Some Kimball Office fabrics** (i.e. some woven fabrics) may relax over time creating a loosely upholstered appearance.

**Kimball Office will always ship a satisfactory commercial match.** Because of industry dye-lot variation, colors may not match exactly.

**Fabrics** are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

# Finishes & Materials

## Kimball Office Seating Upholstery Vision Collection Faux Leather and Leather Application Matrix

### Characteristics:

**Different coverings and seating constructions** will respond better than others to specific seating applications. Certain leathers are more prone to relaxing over time and may demonstrate characteristics such as wrinkling or puddling. This does not indicate that the covering or application is deficient, but is considered a normal, inherent characteristic.

**Some Kimball Office leathers and faux leathers** may relax over time creating a loosely upholstered appearance.

**Leather is a natural product.** Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

**Kimball Office will always ship a satisfactory commercial match.** Because of industry dye-lot variation, colors may not match exactly.

**Leathers and faux leathers** are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

**Terratex** is a registered trademark of True Textiles, Inc. Each Terratex fabric must meet these four criteria:

- Made of 100% post-consumer and/or post-industrial fiber, or compostable materials
- Made using processes that reduce waste, emissions, energy, water usage, and toxic by-products
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.

### Cleaning Leather:

#### Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

#### Deep Cleaning

- Use mild non-detergent soap or cleaner. Wipe surface with a light circular motion. Repeat with clean water.
- Do not soak leather.
- Air dry.

#### Leather is a natural

**product.** Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

*Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.*

**IMPORTANT:** When specifying contrasting fabric, use your electronic specification tools for pricing.

## Contrasting Upholstery and Piping Options

### Contrasting Upholstery

**Contrasting upholstery** is defined by entire back and seat upholstery application. Contrasting upholstery is available on the following seating series:

- Adagiato (half- and full-height back cushion models)
- Delano (lounger and tandem models)
- Enjoy (all models)
- Event (all models)
- Pose (lounger models)
- Villa (lounger, corner, and wedge models)
- Wish (all models)
- Xtreme (all models)

#### Special Applications:

- Arpeggio pillow back models: Back upholstery applies to pillow back only. Remainder of the chair (seat, arms, outer shell) is contrasting.
- Delano back upholstery applies to back; bolster applies to pillow; seat and arms applies to remainder of chair. The bolster and seat/arms can both be contrasting.
- Crescent and Vista (models without piping): Back and seat upholstery applies to cushions. Remainder of the chair (arms and frame) is contrasting.
- Pose contrasting back upholstery applies to the cushion back only. Remainder of the chair (seat, arms, and outer shell) is contrasting.

**Select** any contrasting Kimball Office, Alliance Program, COM, or COL upholstery.

**The best way to specify and price** a seating product with contrasting upholstery is by using an electronic specification tool. If one is not available, you may contact Customer Service.

### Contrasting Button

**Contrasting button** is available on the following seating series:

- Beo (button back model)

#### Kimball Office fabric or leather

MUST be specified if you desire a contrasting upholstery on the button; Alliance program upholstery is not available for contrasting button.

**No upcharge.**

### Contrasting Piping

**Contrasting piping** is available on the following Kimball Office seating:

- Arpeggio (all models)
- Pose (lounger models)
- Vista (models with piping)

#### Kimball Office fabric or leather

MUST be specified; Alliance program upholstery is not available for contrasting piping.

**No upcharge.**

### How to Specify Contrasting Upholstery:

- ① Follow the How to Specify steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric information in the order outlined.

### How to Specify Contrasting Piping:

- ① Follow the How to Specify steps on the appropriate pricing pages for the seating model, indicating the contrasting fabric information in the order outlined.

## Finishes & Materials

### Lead Times/Availability:

#### Lead times for alliance fabrics are based on supplier availability.

Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball Office will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply.

➤Contact Customer Service for availability before finalizing orders.

### How to Specify:

To take advantage of this program, simply follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section. Add the appropriate three-letter supplier prefix to the fabric grade:

**CAR**[grade] = Carnegie

**KNL**[grade] = KnollTextiles

**MHM**[grade] = Maharam

**MAF**[grade] = Mayer Fabrics

Example:

① ② ③ ④  
K46CC **CARJ** 6136\_10 STD  
⑤  
MC

## Alliance Program Upholstery Program Overview

**Kimball Office has formed partnerships with four of the top textile companies** in the industry to provide a broad range of design-oriented fabrics. These fabrics can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

**Patterns from Carnegie, KnollTextiles, Maharam, and Mayer Fabrics** are available in a variety of design aesthetics and price points to meet all of your fabric needs.

**IMPORTANT: Orders cannot be cancelled for alliance program upholstery.**

**Application** of Alliance Program upholstery will be as depicted on the swatch card unless otherwise instructed on the order.

**Directional upholstery**, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

**Fabric that requires non-stock special treatments** such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

**Alliance graded pricing** includes the cost of the material. Repeat is also accounted for and no additional upcharge is required.

**Different fabrics and seating constructions** will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

**IMPORTANT:** The information provided in this section is the most current information available at the time this price list was printed.

# Finishes & Materials

## Alliance Program Upholstery Applicability Guidelines

### Appearance Guidelines:

- 1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- 2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- 3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

### Restrictions:

- 5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

**Kimball Office has listed general applicability guidelines** for each seating frame due to application constraints or aesthetic concerns.

**Appearance guidelines** indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

**Restrictions** indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.

*Note: Specific seating and fabric combinations that are not possible are noted for applicable graded-in Alliance fabrics on the following pages.*

**IMPORTANT:** These guidelines do not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of a material.

- C** = General contract upholstery
- ▶ See page 228 for applicability & restrictions.

## Finishes & Materials

**IMPORTANT:** Before placing an order utilizing COM or COL, please read all the information in this section. Orders for COM or COL are not subject to return.

## COM and COL Process Overview

**Kimball Office will upholster** its products in fabric or leather supplied by the customer whenever possible.

### Step ①

**Review applicability guidelines and restrictions** for the seating frame.

➤ See page 243.

### Step ②

**Send a sample to Kimball Office for approval.** Sample should be no smaller than 5" x 7" for fabric or 4" x 4" for leather. Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:

Kimball Office  
Attn: COM Administration  
1600 Royal Street  
Jasper, IN 47549

**Kimball Office will advise of approval or disapproval.** Approval signifies only that such fabric or leather can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of the fabric or leather.

### Step ③

**Verify yardage requirements.**

➤ See page 245.

### Step ④

**Prepare and send your purchase order.** Purchase order must include:

- Fabric vendor
- Pattern number and name
- Color number and name
- Application instructions (i.e., direction of pattern) for striped, plaid, patterned, or unusual fabrics and which face to use if fabric is reversible.

*Note: If you do not supply application instructions, Kimball Office will apply the fabric in what it determines to be the best manner, and cannot be held responsible after the upholstery is applied.*

**Kimball Office will send an acknowledgement of your order**

with a tentative order ship date and the date by which your COM or COL must be received. If your material is not received by the specified date, your ship date will be reassigned.

### Step ⑤

**After you receive order acknowledgement from Kimball Office, ship your material to:**

Kimball Office  
Attn: COM Department  
340 East 11th Avenue  
Jasper, IN 47549-1001

Please include:

- Dealer name and p.o. number
- Kimball Office seating model number
- Quantity of chairs
- Kimball Office acknowledgement number

# Finishes & Materials

## COM and COL Applicability Guidelines

### Appearance Guidelines:

- 1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- 2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- 3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

### Restrictions:

- 5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the fabric face from the backing, or glue bleeding through the fabric.
- 6 Thin and/or loosely woven textiles cannot be used due to potential fabric separation at the seams.

**Kimball Office has listed general applicability guidelines** for each seating frame due to application constraints or aesthetic concerns.

**Appearance guidelines** indicate characteristics that may be apparent when certain types of fabrics are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster fabrics associated with these guidelines, but you may see some of the characteristics described.

**Restrictions** indicate types of fabrics that cannot be used on the indicated seating line. Fabrics associated with guidelines 5 and 6 prevent us from upholstering them on the applicable chair series.

**IMPORTANT:** These guidelines do not constitute any responsibility nor any warranty on the part of Kimball Office as to appearance, behavior, or durability of a material.

## Finishes & Materials

## COM and COL Additional Information

### Flammability Compliance:

**Kimball Office assumes no responsibility for the flame retardancy of any COM.**

Customers are solely responsible for making sure that COM complies with all applicable codes and regulations.

**When COM or COL products must meet specific requirements,** Kimball Office will require the customer to supply documentation that the material meets the code requirements.

### Fabric Storage:

**Kimball Office** will store excess COM/COL for 6 weeks after completion of order. Unallocated COM fabric will be stored for three months.

**Kimball Office must be advised** if COM is to be retained longer than three months for a future order or if it is to be returned.

### Fabric Characteristics

**Kimball Office inspects fabrics** for mill imperfections, but some are difficult to recognize. Kimball Office is solely responsible for seating workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

**Different fabrics and seating constructions** will respond better than others to specific seating applications. Certain fabric constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the fabric or application is deficient, but is considered normal behavior as an inherent characteristic of the fabric.

**Directional upholstery,** such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

### Decorative Patterns

**Yardage requirements** are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball Office cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.

▶Refer to appropriate column in the COM yardage table on page 245.

**The illustration** above depicts two seat cushions in the proper placement on a piece of decorative fabric. Please note the unusable fabric. It is not always appropriate to place a seat pattern at the edge of the fabric. *Due to this circumstance, please include an additional one-half yard per order.*  
*Note: If repeats are not to be matched, please indicate on the order.*

### Directional Fabrics

**Some COM fabrics are considered directional** that may not be considered directional by the fabric supplier due to the upholstering process used by Kimball Office.

**All COMs are cut “up the roll”** by Kimball Office unless specified differently. To railroad, the pattern must be custom quoted; however, there is no upcharge and leadtimes are not extended.  
▶Please contact **By Design**.

### Customer’s Own Leather

**Customer’s own leather yardage (size) requirements** for Kimball Office seating are based on an average hide size of 45–50 sq. feet.  
▶Consult Customer Service for requirements for other hide sizes.

**The shape of a hide and the usable, clean square footage** may make it necessary for us to request more leather after COL is received.

**Calf hides** must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.  
▶See page 245 for COL requirements.

**Leather is a natural product** and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

# Finishes & Materials

## COM and COL Yardage Requirements

### How to Use this Table:

- 1 Locate the model number
- 2 Select yardage from the appropriate column for non-directional or repeat. For fabrics with nap, use the 1"-4" repeat column.

#### If COM fabric is to be "railroaded," contact

Customer Service for yardage requirements.

**For repeats larger than 18",** we suggest a swatch with one full repeat be sent for yardage requirement assessment:

#### Kimball Office

Attn: COM Dept.

340 East 11th Avenue  
Jasper, IN 47549-1001

Please note the model number and number of chairs.

#### For widths other than 54",

increase the yardage requirement by the factors below:

Fabric width	Increase yardage
50"-53"	15%
48"-49"	30%
45"-47"	45%

**Kimball Office has analyzed each model** to most accurately reflect the yardage requirements. The yardage requirement for each model is based on 54"W fabric and cutting the fabric up the roll.

*Note: When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.*

➤Contact Customer Service.

# Finishes & Materials

## COM and COL Yardage Requirements, continued

### How to Use this Table:

- 1 Locate the model number
- 2 Select yardage from the appropriate column for non-directional or repeat. For fabrics with nap, use the 1"-4" repeat column.

#### If COM fabric is to be "railroaded," contact

Customer Service for yardage requirements.

#### For repeats larger than 18",

we suggest a swatch with one full repeat be sent for yardage requirement assessment:

#### Kimball Office

Attn: COM Dept.  
340 East 11th Avenue  
Jasper, IN 47549-1001  
Please note the model number and number of chairs.

#### For widths other than 54",

increase the yardage requirement by the factors below:

Fabric width	Increase yardage
50"-53"	15%
48"-49"	30%
45"-47"	45%

Model	COM				COL

## COM and COL Yardage Requirements, continued

### How to Use this Table:

- 1 Locate the model number
- 2 Select yardage from the appropriate column for non-directional or repeat. For fabrics with nap, use the 1"-4" repeat column.

#### If COM fabric is to be "railroaded," contact

Customer Service for yardage requirements.

**For repeats larger than 18",** we suggest a swatch with one full repeat be sent for yardage requirement assessment:

#### Kimball Office

Attn: COM Dept.  
340 East 11th Avenue  
Jasper, IN 47549-1001  
Please note the model number and number of chairs.

#### For widths other than 54",

increase the yardage requirement by the factors below:

Fabric width	Increase yardage
50"-53"	15%
48"-49"	30%
45"-47"	45%

Model	COM				COL	Model	COM				COL	Model	COM				COL
	Non-Dir.	1-4" Repeat	5-11" Repeat	12-18" Repeat	Sq. Ft.		Non-Dir.	1-4" Repeat	5-11" Repeat	12-18" Repeat	Sq. Ft.		Non-Dir.	1-4" Repeat	5-11" Repeat	12-18" Repeat	Sq. Ft.

### TB133 Pricing for Kimball Office Upholstery

#### How to Use this Chart:

Note: This chart **must** be used in conjunction with the pricing page for the seating model you are specifying.

- ① Determine the correct model number to which you want TB133 applied and locate it in the chart.  
Note: The **F** at the end of these models represents TB133.
- ② Read across the table to the column for the appropriate upholstery price grade. This is the "base price" of the model.
- ③ Return to the appropriate pricing page for options pricing and to complete your specification based on the How to Specify steps, using the model number including the **F**.

Model	Kimball Office Upholstery Price Grade

\*\* = placeholder for option designators, such as W for arm caps, PU for polyurethane arm caps, or TL, TR, TLR for tablet arm options. See appropriate pricing pages for applicable options and associated upcharges to the base prices shown above. These option designators are part of the base model number and appear before the F designator for TB133.

**IMPORTANT: This chart contains base prices and base model numbers for all TB133 seating models.**

It does not include any option upcharges.

## Finishes & Materials

### TB133 Pricing, *continued* for Kimball Office Upholstery

#### How to Use this Chart:

Note: This chart **must** be used in conjunction with the pricing page for the seating model you are specifying.

- ① Determine the correct model number to which you want TB133 applied and locate it in the chart.  
Note: The "**F**" at the end of these models represents TB133.
- ② Read across the table to the column for the appropriate upholstery price grade. This is the "base price" of the model.
- ③ Return to the appropriate pricing page for options pricing and to complete your specification based on the How to Specify steps.

## Finishes & Materials

### TB133 Pricing, continued for Kimball Office Upholstery

#### How to Use this Chart:

Note: This chart **must** be used in conjunction with the pricing page for the seating model you are specifying.

- Determine the correct model number to which you want TB133 applied and locate it in the chart.  
Note: The "**F**" at the end of these models represents TB133.
- Read across the table to the column for the appropriate upholstery price grade. This is the "base price" of the model.
- Return to the appropriate pricing page for options pricing and to complete your specification based on the How to Specify steps.

**IMPORTANT: This chart contains base prices and base model numbers for all TB133 seating models.** It does not include any option upcharges.

## Finishes & Materials

### Inquiry Form:

**IMPORTANT:** The CAL TB133 Seating Fabric Inquiry Form must be submitted prior to order entry for all seating with COM, COL, or Alliance Program upholstery specified to meet TB133.

➤ See page 268.

## TB133 Process Overview for COM, COL, and Alliance Program Upholstery

### California Technical Bulletin

**No. 133**—Flammability Test Procedure for Seating Furniture for Use in Public Occupancies—provides guidelines for a full-scale, composite burn test. To obtain TB133 certification, a specific model/upholstery combination must be subjected to and pass TB133 testing.

### Kimball Office provides TB133 testing services for COM

(Customers Own Material), COL (Customers Own Leather), or Alliance Program upholstery orders. We require that COM, COL, or Alliance Program upholstery first be evaluated for application approval, then for TB133 approval.

### The Process:

- ① If specifying Alliance Program upholstery for TB133, contact Customer Service to receive a custom quote for your seating order.
- ② Complete the CAL TB133 Seating Fabric Inquiry Form and submit it to Customer Service.
- ③ Kimball Office will determine:
  - If the fabric is similar in content to a previously approved fabric for the chair model;
  - If additional testing is required because no similar test documentation was found for the model/upholstery combination; or
  - If the combination will not meet TB133 requirements, based on previous testing.
- ④ If a burn test is required, pricing for the testing will be as follows:
  - \$1300 (list, including shipping) for testing services; plus the
  - Chair price (test sample)

*Note: COM price is invoiced at Kimball Office Upholstery price grade 1, plus the cost of the COM; COL is invoiced at price grade 3 plus the cost of the leather. All Alliance Program upholstery orders must be custom quoted.*
- ④ If the model/upholstery combination passes testing, you will receive proof of TB133 certification, at which time you may place your seating order.

<p><b>NOTE:</b> California Technical Bulletin No. TB133 is a full scale burn test. Kimball Office will provide TB133 testing services for COM (Customer's Own Material), COL (Customer's Own Leather) or Alliance Partner pattern orders. TB133 Certification is based on actual testing. Approval can also be determined by similar, previously tested fabrics on similar chair models by experts familiar with TB133 testing. As there are a wide array of materials and chair models it is inconceivable to test all possible material and model combinations. All COM, COL and Alliance patterns must first be evaluated for application approval, then for TB133 approval.</p>			
<b>COM APPROVAL INFORMATION</b>			
<input type="checkbox"/>	Fabric is similar in content to a previously approved fabric for this chair model and will not require a full scale burn test. Letter of Assurance is available upon request.		
<input type="checkbox"/>	Additional testing will be required because no similar test documentation was found for this content/model. To proceed with TB133 testing, please submit a purchase order and yardage needed for a specific model. Certification Letter is available upon request.		
<input type="checkbox"/>	Based on previously tested models, this will not meet TB133 requirements.
