**Notes** Key model selections for the Environmental Data Sheet were based on models that best represent the overall product offering. A range of product models with varying characteristics can be grouped together for testing or assessment purposes if the product is expected to perform similarly.

**MATERIALS SELECTIONS****98% of the materials can be recycled after using this chair**

**Aluminum** Components contain at least 40% pre-industrial recycling content.  
**Plastics** Components contain at least 3% post-industrial and 19% pre-industrial recycling content.  
**Steel** Components contain at least 60% post-industrial recycling content.  
**Fabrics** Fabrics are offered with up to 100% recycled polyester.  
**Packing** Contains at least 79% post-industrial recycling content.  
**Notes** Kimball Office encourages recycling at the end of the products life cycle. Recycling of these materials will depend upon local programs.

**MANUFACTURER COMMITMENT**

**Environmental Policy** Kimball Office believes a balance must be reached between mankind and the environment. We are truly concerned about the destruction of the world's forests, and over the issues of pollution reduction, recycling and waste disposal. For more information on our environmental policy, please go to [www.kimballoffice.com](http://www.kimballoffice.com).  
**Solid Waste Management, Hazardous Waste Management, & Air Pollution Control** Visit the Kimball International website for the latest recycled/reused efforts, hazardous waste and volatile organic compounds (VOC) reduction efforts, and learn more about how we manage other sustainability efforts to restore our environment.  
**Notes** All Kimball Office manufacturing facilities undergo an Annual Environmental/Safety Audit, conducted as if the most stringent EPA/OSHA Inspector is performing the inspection.

**LEED POINT CONTRIBUTIONS**

- ID Credit 1** **Innovation and Design** LEED Innovation in Design credits may be earned when a project exceeds twice the base requirements of the credit or in the case of multi-tiered credits the next incremental percentage threshold. Kimball Office products with high recycled materials content and low emitting materials may contribute to earning an innovation credit.
- MR CI-NC Credit 2** **Construction Waste Management; Divert 50-75%.** Kimball Office packing materials include cardboard, polyethylene film and expanded polystyrene which are easily recyclable in most markets reducing landfill disposal. Kimball Office also routinely bulk packages smaller products which can reduce the amount of packaging required.
- MR CI-NC Credit 3** **Resource Reuse** All Kimball Office | Interstuhl products are designed for long life and durability. LEED credits may be earned when reusing materials on a project. Our products are designed to be easily moved for reuse on future projects.
- MR CI-NC Credit 4** **Recycled content - Post + ½ Pre Consumer 10-20%.** See detailed information above; Xantos has 35% recycled content applicable to LEED credits.
- IE CI-NC Credit 4** **Indoor Environmental Quality – Low Emitting Materials.** Xantos meets or exceeds the standards for indoor air quality emissions of a variety of organizations and government agencies and is certified to the BIFMA e3 Furniture Sustainability Level™ and SCS Indoor Advantage Gold. Certificate copies can be found at [WWW.scscertified.com](http://WWW.scscertified.com) with links on our own web site at [www.kimballoffice.com](http://www.kimballoffice.com).
- MR CI-NC Credit 5** **Regional Materials.** The sole production site for Kimball Office | Interstuhl is located at 72469 Messstetten-Tieringen, Germany. This credit (500 miles or less between production and application sites) will not be available for chairs sold in the U.S.
