

Flexboard

Tools Required

- None

Package Contents

- 1 Flexboard

Installation

1. Grip flexboard firmly on each side and position in front of Traxx. (Figure A).
2. Tilt top of flexboard towards Traxx. (Figure B).
3. Insert tabs on both top brackets into the center reveal of the Traxx. (Figure C).
4. Ensure both brackets are fully inserted. (Figure D).
5. Allow bottom of flexboard to rotate inward flush against wall. (Figure E).

Note: Flexboards can also hang off the top edge of the upper Traxx, however, the anti-dislodgement feature will not engage in this position and will prevent the projection screen or marker swivel board from passing over the flexboard.
