

Xsite®

Tackable Acoustic, Metal, Wood, Laminate, Paint, Marker Board and Slant Tiles

Caution: Tiles must be installed in a climate controlled environment. Extreme changes in humidity or temperature can damage tiles. Store all tiles flat until installed. Do not stack on top of tiles. Large tiles are to be installed by two people. Do not handle by the corners and be careful not to damage the corners.

Tools Required

- Tape Measure

Installation

1. On tackable acoustic and wood tiles, locate label on back of tile. Install with label right side up.
2. Insert top of tile into upper Xsite Traxx® and lower into Xsite Traxx or bottom channel below. (Figure A). Carefully slide left or right to align. Frame glides may need to be adjusted to improve tile alignment.
