SKYE®

**Exquisite comfort.**

There is every reason to unite beauty and function in a tool as essential as office seating. Skye gives equal measure of eye appeal and superb support. The result is exquisite comfort that enables you to perform at your best. Whatever the posture, Skye quietly redefines comfort.

**SKYE®**

- Patented synchro-tilt mechanism with 4-zone tension adjustment
- Reduces fatigue and minimizes adjustments by providing naturally balanced tension as you recline
- Permits you to recline and stop in any position with minimal effort
- Contoured seat reduces pressure under the thighs and promotes circulation to the legs
- Web back's open weave membrane adapts to your body's contours and movements while providing ventilation
- Upholstered seat gives proper support and adjusts for depth

### Striking looks.

When it comes to comfort, appearance matters. Skye chairs combine European precision with universal practicality for stunning good looks that hint at the comfort you're about to experience. Sleek web back, meticulous upholstery, and sculpted base give Skye an appealing, memorable appearance.

- Our designers conceived the chair's frame as both a functional and aesthetic design element
- We integrated controls in a subtle, highly efficient way to avoid compromising the chair's appearance
- Attention to detail in design and construction make Skye an elegant statement of fit, finish, and appearance
- NeoCon® recognized Skye with a Gold Award and Orgatec presented it with an Architecture and Office Prize for Innovation

**Intuitive movement.**

Movement is a natural component of work. Skye chairs provide comfortable, healthful support in any posture. Each chair comes fully equipped for complete ergonomic, low stress support. Straightforward controls—easy to reach and requiring only minimal grip strength—let you make adjustments without a thought.

- Skye comes with all adjustments standard, so you get everything necessary for comfort, productivity, and healthy sitting
- Four zone side access tension adjustment accommodates different users' weights and preferences
- Skye's controls are simple and intuitive, easy to reach and adjust
- Synchro-tilt mechanism provides simple dynamic support that automatically responds to your movements
- For lower seat-height requirements, specify P2 pneumatic cylinder/base option

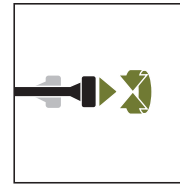

Angle Skye's seat pan forward 4 degrees by depressing a lever to put your body in a healthy work-intensive posture.

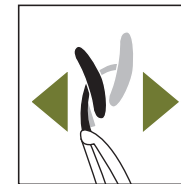

Sit upright or slightly reclined in the Skye chair and receive comfortable support for your entire body in these common work postures. Lock the backrest in any position with just the flip of a lever.

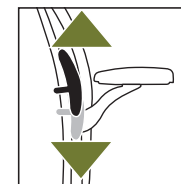

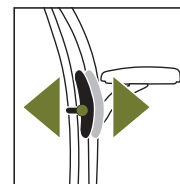

Recline over a 40-degree range and experience the support Skye's synchro-tilt motion provides even in deeply reclined postures.

Lift yourself slightly off the seat and turn the **reclining tension** adjustment knob to any of four settings for the one that feels comfortable for your weight.

Adjust Skye's optional **headrest** up and down through a 3 1/2-inch range and forward and back over a 3-inch range. In addition, you can tilt the headrest up to 35 degrees.

Move Skye's **lumbar support** up and down over a 4-inch range on the vertical spine located behind the chair's back. Fine-tune the lumbar support depth over a 3/4-inch range.
