

Now, your ideas need not be confined to the cube

Xsite is a frame and tile system that lets you think beyond the usual vertical and horizontal constraints. Because our Traxx® mounting system is integral to the frame, you can place tiles, worksurfaces and storage components anywhere on Xsite.

Kimball® Office

XSITE®

Xsite® panels help you get out of the box by giving you more shapes to work with

Xsite frames are available in **five** different base heights and can be built up to 80" and 93" tall by adding one or two stackers. Dimensions are calculated to the top of the frame with glides fully recessed. Curved profile top caps add 1/2" to overall height; flat top caps add 1/4". Glides provide 2-1/2" adjustment.

- Xsite frames are available in five heights: 2-high for shared workstations, 3-high for transaction applications, 3.5-high for seated privacy (yet daylight and window views), 4-high to match vertical storage heights, and 5-high for standing privacy. Stackers let you build higher, for increased privacy.
- Works with Traxx® to start a run of panels off the wall.
- Tiles can be placed independent of the frame, giving you more design options.
- Wide variety of glass, wood, laminate, painted, or fabric tiles, and performance tiles make use of space inside the frame to store the things you need to have at hand.
- Distribute power and data easily, almost anywhere within the frame.
- 90-, 120- and 180-degree connectors help you create more interesting offices.
- Frames can be extended in 3"-wide increments for customized size.
- Frameless glass screens add panache to collaborative areas.
- Footprint® worksurfaces and storage complete your Xsite station.

Xsite may contribute to LEED credits. Please refer to our Environmental Data Sheets, located on www.kimballoffice.com, for specific details.

Xsite meets SCS Indoor Advantage certification.

Kimball Office products are level™ certified. level™ provides an easy way to understand how our products can contribute to your sustainability goals. level™ assures a comprehensive, independent and impartial assessment of the environmental and social impacts of a product's manufacture to the BIFMA e3 sustainability standard.
